

Release Note for Vigor2925 Series

Firmware Version:	3.8.9.5
Release Type:	Normal
Applied Models:	Vigor2925 Series

Vigor2925 series is a broadband router which integrates IP layer QoS, NAT session/bandwidth management to help users control works well with large bandwidth. The state-of-art routing feature, VPN security, and Dual-WAN provide integrated benefits for professional users and small offices.

New Features

- None.

Improvement

- Improved: Add control of which LAN / Source IP can be used for TR-069 management.
- Improved: Add LTE's SMS option as SMS provider for other feature (such as Hotspot).
- Corrected: Unable to update OpenDNS successfully.
- Corrected: Country IP database was not up to date.
- Corrected: Web portal Google authentication failed to work.
- Corrected: Enabled brute force protection for TR-069 caused VigorACS unable to read CPE.
- Corrected: Windows10 Client was unable to create an IKEv2 EAP VPN connection while the router used the Self-Signed CA.

Known Issue

- The WAN port can not work well with Alcatel I-040G device. The quick solution is to add another switch between Vigor2925 and Alcatel I-040G.
